

MOTOR VEHICLE LICENSE PLATE ILLUMINATED SPACER

ABSTRACT: A plastic plate to copy shape of motor vehicle license plate with regards to rounded corners, height, and lengths for a variety of license plate sizes. Thickness will vary and transparent colored edge of plastic spacer plate will be polished. Mounting holes of the spacer plate coincide with the mounting holes of various license plates. Subtle look of spacer plate in the daylight will be gem-like with a clean custom look. While at nighttime, under motor vehicle operation, the sandwiched spacer plate's edge will illuminate by the required license plate light. This added light at the rear of the vehicle will be beneficial for added nighttime visibility.
